

Brussels Sprouts

Bitesize F1 TZ 0299

General Description:

A unique hardy variety that produces small dark green buttons about half the size of standard sprouts. Maturing from November, TZ 0299 produces sprouts that have a great texture and flavour and will hold at a 'baby' size until late January, making this variety perfect for supplying the premium Brussels Sprouts market.

Profile:

Type:	Hybrid
Cropping Period:	Nov-end of February
Days to Maturity:	240
Sprout Colour:	Green

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
