

Runner Bean Moonlight

General Description:

The culmination of many years of breeding work, Moonlight is the earliest variety of a new line incorporating the genetics of climbing French bean types. This gives Moonlight all the flavour of a runner bean plus the potential for some self-pollination. The pods produced are very smooth and fleshy and approximately 25cm long.

Profile:

Days Maturity	65-75
Cropping Period	Early/mid
Colour of Flower	White
Pod Length	25-30 cm
Pod Width	2-2.5 cm
Stringless	Semi

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
