

Japanese Spinach

Brassica rapa var. perviridis

Komatsuna TSX 813

HYBRID

General Description:

Fast growing and very uniform hybrid. Its dark green petioles are tender and juicy. Erect plants can be harvested young like spinach, as loose leaves or more mature like cabbage, as whole head. The flavour becomes stronger and spicier as the plants mature. There is a high nutritional level of calcium and potassium in the leaves. All year round production.

Profile:

Type	Hybrid	Relative maturity	30 days baby leaf, 50 days mature
Leaf Colour	Dark Green	Habit	Very productive
Leaf Shape	Oval	Height	20-30 cm
Stem Colour	Green	Flavour	Similar to turnip leaves

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
