Pumpkin

Pot of Gold F1

General Description:

Pot of Gold is consistently the earliest maturing pumpkin in our trials, maturing at least 2 weeks earlier than other early varieties, making it very suitable for growing in cooler climates where the summer season can be short or unreliable. A very smooth skin makes this Hallowe'en pumpkin easy to carve. Suitable for containers or where space is limited, and in a field situation planting density can be increased to maximise yields.

Profile:	
Days to Maturity	Early (80 USA days)
Plant Habit	Very compact vine
Fruit Uniformity	Hybrid
Fruit Colour	Bright Orange
Fruit Shape	Round
Weight	4-5 kg
Diameter	25 cm
Storage	3

Key

Storage	1 = short	5 = long

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
