	PV-1028	Oriental	2	9		Pfs 1-12,14-16

Growth

1 = very slow growth

9 = very fast growth

Resistances

Pfs = Peronospora farinosa f.sp. spinaciae

Resistance level

HR = High Resistance

IR = Intermediate Resistance

Sowing period

general recommendation;

varies per region

Bolting tolerance

1 = low bolting tolerance;

9 = high bolting tolerance

Figures and information in this brochure are based on the average results of large scale plantings under European conditions and may vary with local environmental and agronomic conditions, grower skills, microclimate and soil structure. Resistance is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure.

Pop Vriend Seeds does not accept liability based on the information for deviating results in the cultivated product. Buyers and users of Pop Vriend Seeds varieties are responsible to determine suitability of the seeds to intended cultivation and local circumstances.

All contracts for delivery of goods are subject to our [general terms of sales and delivery](#). You can also ask for a copy via info@popvriendseeds.nl. In addition ISF rules are in force.
