KALES

NEW

Tozer Seeds are renowned for leading the way in fresh-thinking creative innovation, and have developed an enviable portfolio of unique products.

Kales are currently undergoing a huge resurgence in popularity due to their fantastic nutritional benefits. Tozer Seeds predicted this trend some years ago and have reacted by the timely development of a brand new contemporary range of brightly coloured kales with fantastic leaf textures and unique eating qualities.

All these new Tozer-bred kales require only very light cooking and are well suited to modern culinary methods including stir-fry, steam and microwave. They do not need to be boiled like traditional kales and are mild and sweet to eat with none of the traditional brassica bitterness associated with older kale varieties. The new kales work well in shredded mixed leaf packs where the fantastic colours and textures will be sure to catch the customer's eye and the fantastic flavours will guarantee repeat purchases.

Cultivation of the new Tozer kales is identical to traditional kales, using the same sowing dates and spacings and they are all very winter hardy. They are also very versatile, with some varieties being suitable for babyleaf production and all varieties being suitable for harvest from young plants to full-grown mature leaf.

Cavelo Nero: *Black Magic*

A striking new variety of black cabbage (cavelo nero/ Tuscan kale) that has a more uniform, darker, narrower and more heavily textured leaf than traditional types. The plant habit is a neat rosette to ease harvest and the variety has been selected for improved cold tolerance and resistance to winter leaf rubbing lesions. Perfect for repeat cuts from mature plants and superb as a babyleaf product as the colour and texture develop very early.

Emerald Ice TZ 9332

Midnight Sun TZ0277

Buttonhole Kale®: *Starmaker TZ 8011*

Forms a small rosette head that makes a fantastic high value product for contemporary dining. Bold, bright pink ribs contrast against the dark green sweet leaf. The outer leaves can also be cut and used as a colourful shredded product to give added value.

Coloured Kale: *Emerald Ice TZ 9332*

An amazing new variety that has the best eating quality of all kales. The textured, ruffled leaves develop a striking contrasting white centre as they mature and have a very sweet flavour, even the leaf stalks taste like candy and have the crispest texture. The very ruffled leaves give great bag-fill. This variety is also suitable for multiple cuts.

Midnight Sun TZ 0277

A stunning variety with a deep red textured leaf and a striking pink mid vein. Suitable for multiple cuts, TZ 0277 is very versatile, the best variety for use as a baby leaf kale and also works well as a mature plant.
