

Celery

Nero F1

Hybrid

General Description:

This is our newest introduction for early and main season cropping to run alongside Victoria. Extensive UK trials have shown this variety to be quick to mature and gain weight early in the season and often slower to bolt than Victoria. With similar colour and texture to Victoria as well as excellent eating qualities we believe this variety will be a great addition to our range.

Profile

Maturity Slot:	Early/main season	Petiole color:	3
Height to 1st knuckle (cm):	28	Petiole texture:	3
Resistance to bolting:	4		

Key

Petiole color:	1 = v. pale	5 = dark green
Petiole texture	1 = v. ribby	5 = v. smooth
Resistance to bolting:	1 = low	5 = high

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
