

Carrot

Daucus carota

Flyaway F1

HYBRID

General Description:

Flyaway combines roots of attractive shape, colour and smooth skin, with good resistance to carrot root fly. The variety has been bred to be less attractive to the egg laying flies and the maggots grow poorly on it.

Profile:

Type	Nantes	Colour	Orange
Crop time	Early	Skin	Smooth
Root shape	Blunt ended	Flavour	Sweet
Root length	15 cm	Disease resistance	Resistance to Carrot Root Fly

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
