

Coriander

Coriandrum sativum

Calypso™

General Description:

Calypso is a slow bolting Tozer bred variety which is substantially slower to bolt than any other coriander available. In our trials it is consistently 3 weeks slower to bolt than Santos. Plant breeder's rights granted.

Profile:

Bolting At least 3-4 weeks slower to bolt than other slow bolting varieties such as Santos

Plant habit Low growing point.

Seed size Small – but ideal for leaf production not seed

Remarks It also has a very low growing point which makes it possible for this variety to be cut and allowed to re-grow, therefore significantly reducing production times

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
