

Parsnip

Albion F1

Hybrid

General Description:

Albion has a very white skin finish which is noticeably slower to discolor. Roots are an obovate root shape which taper nicely, filling well down the root length, making it suitable for retail trade and also popular for processing. Produces heavy weight yields and is suitable for early/main season sowing with lifting from autumn to mid-winter.

Profile:

Root length cm	28	Speed of Discoloration	3
Root shape	3	Crown depth	3
Root color	4	Skin smoothness	4

Key

Root Shape:	1 = slender	5 = bold	Speed of discoloration:	1 = rapid	5 = slow
