

## Parsnip

# Javelin F1

Hybrid

### General Description:

Consistent, reliable, flexible and very well proven Javelin is the most successful commercial F1 hybrid parsnip available. Javelin produces a slender wedge shaped root-ideal for pre-pack market. Shallow crowns make for easy cleaning. Can be sown throughout the sowing year and its tremendous field holding capacity and excellent canker resistance means it can be cropped almost continually from July to June.

### Profile:

|                |    |                         |   |
|----------------|----|-------------------------|---|
| Root length cm | 24 | Speed of Discolouration | 1 |
| Root shape     | 2  | Crown depth             | 4 |
| Root colour    | 3  | Skin smoothness         | 3 |

### Key

|              |             |           |                          |           |             |
|--------------|-------------|-----------|--------------------------|-----------|-------------|
| Root Shape:  | 1 = slender | 5 = bold  | Speed of discolouration: | 1 = rapid | 5 = slow    |
| Root colour: | 1 = cream   | 5 = white | Crown depth:             | 1 = deep  | 5 = shallow |
|              |             |           | Skin smoothness:         | 1 = rough | 5 = smooth  |

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
