

Salad Onion

Eiffel

General Description:

A white Lisbon type but with distinctive stiff upright leaves which shed water very effectively, making Eiffel less susceptible to disease at difficult times of the season. Slow to bulb, especially in the long days of summer. A very versatile variety, which although predominantly for spring and summer production, will overwinter with careful crop husbandry. An ideal companion for Ramrod, especially during the summer cropping period.

Profile:

Erectness	Peelability	Ease Of Lifting	Bulbing	Height (cm)	Shank Length (cm)	White Length (cm)
3	3	4	3	50-55	9	3

Key:

Erectness:	1 = less erect	5 = very erect	Peelability:	1 = less easy	5 = very easy
Ease of lifting:	1 = less easy	5 = very easy	Bulbing:	1 = bulby	5 = not bulby
