

## Salad Onion Marksman

## **General Description:**

Marksman has upright dark green foliage, excellent taste and peels very well. This superior variety is a great choice for growers. It is suitable for the spring/summer cropping period but also ideal for autumn crops when disease can be a particular problem. This is because a vigorous root system helps to maintain the strong, upright leaves. It is a very distinct and innovative salad onion from the Tozer Seeds breeding programme. As it is an interspecific variety, it combines the non-bulbing qualities of *Allium fistulosum* varieties and the reduced pungency qualities of *A. cepa* types.

Erectness	Peelability	Ease Of Lifting	Bulbing	g Heigl (cm		Shank Length (cm)	
5	5	4	4	66-7	1	15	3
