

Salad Onion

Marksman

General Description:

Marksman has upright dark green foliage, excellent taste and peels very well. This superior variety is a great choice for growers. It is suitable for the spring/summer cropping period but also ideal for autumn crops when disease can be a particular problem. This is because a vigorous root system helps to maintain the strong, upright leaves. It is a very distinct and innovative salad onion from the Tozer breeding programme. As it is an interspecific variety, it combines the non-bulbing qualities of *Allium fistulosum* varieties and the reduced pungency qualities of *A. cepa* types.

Profile:

Erectness	Peelability	Ease Of Lifting	Bulbing	Height (cm)	Shank Length (cm)	White Length (cm)
5	5	4	4	66-71	15	3

Key:

Erectness:	1 = less erect	5 = very erect	Peelability:	1 = less easy	5 = very easy
Ease of lifting:	1 = less easy	5 = very easy	Bulbing:	1 = bulby	5 = not bulby

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
