

About Us

We are a successful, independent, vegetable plant breeding company based in the UK.

We market our seeds around the world and have established businesses in the USA, The Netherlands and Spain.

Arugula

Our Product

Tozer Seeds began breeding wild arugula over 20 years ago, our varieties are now grown extensively around the world.

We have recently developed a selection of new varieties.

These provide growers with plants which

- have higher vigor
- are slower to bolt
- have increased mildew resistance
- improved shelf life.

Salad Arugula

Variety Name	Uniformity	Plant Habit	Serration	Vigor	Bolting Tolerance	Leaf Color	Leaf Thickness
Surrey	4	3	5	5	4	3-4	4

Uniformity:	1 = Low	5 = High	Bolting Tolerance:	1 = Low	5 = High
Plant Habit:	1 = Flat	5 = Erect	Leaf Color:	1 = Pale	5 = Dark
Serration:	1 = Low	5 = High	Leaf Thickness:	1 = Thin	5 = Thick
Vigor:	1 = Low	5 = High	Mildew Resistance:	IR = Intermediate	HR = High

Wild Arugula

Apollo

Apollo is a wild variety which has intermediate mildew resistance. It delivers a similar vigor to Voyager with good uniformity. It has a good color and upright habit.

Athena

This variety has been especially bred to incorporate intermediate resistance to downy mildew. Trials throughout Europe, Oceania and USA have shown significantly reduced levels of mildew in the field compared to standard wild arugula varieties. The mildew resistance makes this an ideal choice for main season and autumn productions

Aphrodite

A wild type of arugula which has intermediate resistance to mildew. It has a similar speed to Voyager and good jagged leaf shape

Dragons Fire

A new unique wild arugula variety with an attractive red vein. It also has a great flavor and improved uniformity with good vigor.

Ares

Ares is a mildew resistant wild variety. It is slow bolting with decent growing speed. This variety has a similar leaf shape to Voyager with a stronger color

Eros

A wild arugula variety with good mildew resistance in trials in the UK, Spain, Northern Europe and the US. This variety is upright in habit. It has with fine leaves which are evenly serrated and have a good thickness.

Wild Arugula

Poseidon

A fast growing variety with high yields. It has shown good mildew resistance in trials in the UK, Spain, Northern Europe and the US. It has nicely serrated, thick leaves.

Zeus

A slower growing, slower bolting variety for the warmer months giving greater harvest flexibility. It has a darker, thicker leaf which may give improved shelf life and improved resistance to adverse weather. It also has intermediate mildew resistance.

Wildfire®

Wildfire® was bred to be distinctive both in its flavor profile and its leaf shape. The flavor is hot and peppery; the leaves are less uniform than standard wild arugula giving this variety a more wild appearance.

Salad Arugula

Surrey

Surrey is a fantastic, vigorous variety which has a refined, heavily serrated leaf shape. It has extreme bolting tolerance and a great spicy flavor. It is also fast to establish even on cold soils.
