

About Us

We are a successful, independent, vegetable plant breeding company based in the UK.

We market our seeds around the world and have established businesses in the USA, The Netherlands and Spain.

Rocket

Our Product

Tozer began breeding wild rocket over 20 years ago, our varieties are now grown extensively around the world.

We have recently developed a selection of new varieties.

These provide growers with plants which

- have higher vigour
- are slower to bolt
- have increased mildew resistance
- improved shelf life.

Artemis	4	4	5	3	5	5	4	IR
Athena	4	4	4	3	4	3	4	IR
Ares	3	4	4	4	3	4	4	IR
Voyager	3	4	4	4	4	3	2	-

Salad Rocket

Variety Name	Uniformity	Plant Habit	Serration	Vigour	Bolting Tolerance	Leaf Colour	Leaf Thickness
Astra	4	3	5	5	4	3-4	4

Uniformity:	1 = Low	5 = High	Bolting Tolerance:	1 = Low	5 = High
Plant Habit:	1 = Flat	5 = Erect	Leaf Colour:	1 = Pale	5 = Dark
Serration:	1 = Low	5 = High	Leaf Thickness	1 = Thin	5 = Thick
Vigour:	1 = Low	5 = High	Mildew Resistance:	IR = Intermediate	HR = High

Wild Rocket

Apollo

Apollo is a wild variety which has intermediate mildew resistance. It delivers a similar vigour to Voyager with good uniformity. It has a good colour and upright habit.

Ares

Ares is a mildew resistant wild variety. It is slow bolting with decent growing speed. This variety has a similar leaf shape to Voyager with a stronger colour

Artemis

This variety is an ideal variety for use in the summer period. It is extremely slow bolting with very dark, highly serrated leaves.

Voyager

More vigorous, uniform and upright than standard varieties, slower bolting with dark-green, thick leaves.

Athena

This variety has been especially bred to incorporate intermediate resistance to downy mildew. Trials throughout Europe, Oceania and USA have shown significantly reduced levels of mildew in the field compared to standard wild rocket varieties. The mildew resistance makes this an ideal choice for main season and autumn productions

Salad Rocket

Astra

Astra is a fantastic, vigorous variety which has a refined, heavily serrated leaf shape. It has extreme bolting tolerance and a great spicy flavour. It is also fast to establish even on cold soils.
