Pumpkin

Gold Speck F1

A prolific cropper with uniform fruits, Gold Speck is a firm favourite. Orange, scalloped fruit approx. 110g. Most fruit set close to the crown early and escape virus flecking.

Jill Be Little

A prolific yielding, mini ornamental pumpkin. Perfect for autumnal decoration due to its size and scalloped shape. Fruits 200-250 grams.

Baby Bear

This mini pumpkin is the perfect size for young children with a weight of around 1kg and a slender handle. Great for decorative use and their semi-hulless seeds can be roasted for snacks.

Fright Night F1

We are excited to introduce this small dark orange pumpkin to the UK market. It has performed consistently well in our trials in both Surrey and further north.

Rocket F1

Established variety, oval fruited, large vine type with orange colouring and strong handles, mid-season maturity and good yields, dependable.

Racer F1

Our best selling Halloween variety, 5 to 7 kg round fruits with strong handles. Semibush variety which matures early, it is consistent and high yielding.

Cauldron F1 PMR

A hybrid pumpkin with uniform oval fruits, dark orange colouring and strong handles. It is a large vine type with mid-season maturity and good yields. PMR (Powdery mildew resistance).

Cargo F1 PMR

Medium to large-size Jack-o'-Lantern hybrid pumpkin with strong green handles. It's a bright orange globe shape with fruits about 6-10kg PMR (powdery mildew resistance).

Wicked F1

A Tozer bred variety, which produces a high-quality, large, 'monster' pumpkin, ideal for Halloween. It is well-suited to cultivation in cooler climates such as the UK and can thrive even in poor summers as it is early to mature.

Gold Medal F1

Our best-selling larger variety, Gold Medal is a consistent performer with solid, dark orange fruits and strong handles. Excellent for farm shops and PYO.

Pumpkin / NOVELTY

Casperita F1

Very attractive, small white pumpkin. Produces a uniform crop with excellent skin finish and strong handles. Stays white for an extended period postharvest.

Snowball F1

Novel, bright white, small pumpkin with dark green handles. Holds its white colour well under stress. Excellent for PYO sales.

Crystal Star

Crystal Star is an exceptional new variety, the bright white fruits that hold their colour at maturity, without bruising or turning yellow. Pumpkins are a medium size.

Polar Bear F1

Extra-large bright white pumpkin which retains its colour well after maturing in the field. Popular in decorative displays.

Rouge vif d'Etampes

French heirloom variety also known as Cinderella. An attractive, unique shape with deep red colouring makes it a popular choice for novelty ranges.

Big Moose

Semi trailing producing one fruit per plant. Big Moose has the potential to grow very large given the right conditions. Pairs beautifully with Polar Bear for seasonal displays.

Zombie

The scariest and wartiest Halloween pumpkin available! Zombie is a terrifying variety from Tozer, perfect as a stand-out novelty for Halloween displays. It's a high yielding variety with uniformly warty fruits and thick skin.

Warthog

British bred Warthog is a larger version of the popular variety Zombie. It delivers uniform fruit size and consistent warting. Perfect for displays and ornamental use.

Goosebumps F1

Larger sized, warted pumpkin, very popular for Halloween displays. Please note quantity of warts can vary depending on conditions.

TZ 8302 F1

TZ 8302 produces excellent yields of flashy striped fruit, a great variety for supermarkets and farm shop sales. Its bush habit and attractive colour would also make it suitable for gardeners with limited space.

Mellow Yellow F1

Distinctive yellow pumpkin with strong green handles. Mellow Yellow has a weighty, blocky round fruit which is uniform in both shape and size, it also has high resistance to powdery mildew.

Squash

Sweet Lightning F1

Flatter dumpling style fruits with exceptional eating qualities. Fruits are orange and yellow striped with delicious sweet flesh.

Celebration F1

Golden striped acorn with deep orange flesh make this a highly decorative ornamental-edible. Prolific cropper on a strong plant. Very good eating qualities.

Harlequin F1

Our best selling acorn type, Harlequin is early maturing and produces an abundance of green striped fruits with exceptionally sweet flesh.

Honey Bear F1

An attractive variety producing glossy darkgreen, acorn fruits. Honey Bear is a semi-bush plant resistant to powdery mildew.

Table Star F1

Competitive with the best in the market, plus it has 50% higher sugars than the other acorns and it is Powdery Mildew Tolerant (PMT).

Table Gold

A highly attractive Golden Acorn type with excellent yields, a great addition for the mixed bin category. Highly recommended.

Rosie TZ 1867 F1

Stunning pink kabocha squash with a glorious texture. Pale pink at harvest. It has the potential for long storage with the best eating quality being 2-5 months after harvest.

Onion

Also known as Uchiki Kuri, onion shaped with a deep red skin and thick orange flesh. Fruits average 1 to 1.5kg.

Large Green Kabocha F1

A very good yielding kabocha type with excellent storage potential, and great flavour. Has pale green stripes with rich, orange, dense flesh.

Sunspot F1

Bright red fruited variety with deep orange flesh and good eating qualities. Very attractive and eye catching

Crown Prince F1

Renowned for its eating qualities, Crown Prince is an attractive steel grey squash. Large fruit with deep orange flesh and long storage potential.

Porcelain Doll F1

Maxima type producing beautiful yields of pale pink fruits, a head turning variety that catches the attention of children and adults alike! Its dark orange, sweet flesh make this a versatile product suitable for both ornamental and culinary use.

Butternut

Hunter F1

Bred by Tozer for the Northern European climate, Hunter is up to four weeks earlier to harvest than US hybrids. Fruits average 1-1.5kg with a high level of marketable yield.

Sweetmax F1

This processing type has large 3.5 kg fruits with great internal colour and flavour. This traditional shaped butternut grows on a full vine plant and has the potential to produce a large amount of uniform fruits.

Inca Gold

Inca Gold is a South American 'Coquina' type bred to be easier to cultivate, in cooler climates. Producing reliable earlier yields of sweet, uniform fruits, it has an exceptional deep orange flesh, small seed cavity and a unique mottled green and tan skin finish. Fruits continue to ripen and increase in sweetness post-harvest.

Autumn Crown F1

Autumn Crown produces an abundance of attractive early maturing butternut coloured scalloped fruits each weighing around 2 kg from reduced vines. The long-storing fruits have a unique 'sweet melon' aroma when cut.
